

FRANCHISE OPPORTUNITIES

How it works:

- You book the appointment
- You complete the sales order details and collect a deposit
- The order and deposit are forwarded to us
- We arrange finance and liaise with the customer about installation
- The units are installed by our engineers
- On completion, the customer is asked to sign a satisfaction document
- We issue you with a cheque for your commission.

We provide a complete support package, including technical, service, sales and marketing.

We couldn't make it any easier!

We offer you the possibility of seriously increasing your sales and profit figures. Furthermore, we offer the added bonus of on-going commission fees from the customers you set up. Just because you haven't directly been involved in an additional sale from your customers doesn't mean you miss out - all contact details are recorded by us and any additional business coming from your original customer results in further commission paid directly to you.

Our success is based on a thorough knowledge of the market needs of today - we intend to keep it that way, not only to meet current but also future demands as they arise.

Our sales are growing healthily, meeting the demand for fast, accurate and, most importantly, competitively-priced vehicle tracking and management systems.

Although there are several similar systems around, our tracking system offers some unique features:

- It's accurate – 30 second polling at no extra cost
- It offers pan-European coverage at minimal cost
- It's extremely competitively priced
- It's constantly changing with the developments in new technology.

In a nutshell, it meets customer demand – it offers the technology they want, on hand whenever they want it.
